

Cordless Bamboo Shades - Installation Instructions

Congratulations on purchasing the best in class cordless bamboo shade on the market. You will enjoy this superior product in which quality was never compromised.

Parts Included: Shade Width	Brackets 	Anchor	Screw A (large)	Wing Nut 
40" and below	2	8	8	2
41"+	3	12	12	3

Step 1 – Select your shade positioning

Select the method of mounting your shade that best suits your purpose and determine the shade's precise location.

- 1) Inside the window frame.
- 2) On the outside of frame
- 3) On the overhead surface ceiling.

Inside Mount – Window/Ceiling installation

An inside mounted shade is made to fit inside the window recess and will have a slight gap between the shade and window frame. Your brackets will either attach to the sides of your window casing or the top

Outside Mount – Frame/Wall/Ceiling installation

Your shade should be made to overlap the window opening and your brackets will be mounted:

- to the frame (screws towards the wall)
- your wall (screws towards the wall)
- the ceiling above your window. (screws towards the ceiling)

Step 2 - Install brackets and hang the blind

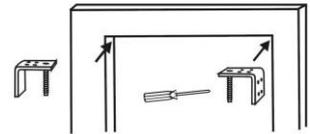

While holding the headrail mark where the shade's brackets will attach with a pencil and drill 1/16" pilot holes into the window casing. Fix the brackets using the screws provided. Wall plugs or anchors (not provided) may be necessary depending on the type of surface the brackets will attach to and weight of your shade. Hang the blind with the pulley facing inwards and the valance covering the headrail. Tighten the wing nuts under the headrail to secure.

Step 3 – Using and caring for your new shade

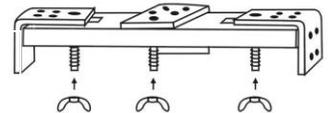

Now that your new shade is installed, take care to lower and raise your shade slowly using the middle of the bottom bar. If there are any issues, make sure that the cord is not stuck and if it is, take care to loosen it.

To clean your shade, use a micro-fiber cloth or carefully use the brush attachment to your vacuum for finer materials.
